## **Abraxas**

Written by: -

Abraxas is a demon of the astral plane who destroy witches by demonising their powers.

Abraxas is known in the Gnostic writings of Simon Magus, the father of Gnostics. It is said the name originated as a replacement for the unmentionable name of the Supreme Being. He was depicted with a lion's head surrounded by rays during Gnostic ceremonies. It is said that the Persian sun god also had this name.

Basilides of Egypt, an early 2nd-century Gnostic teacher, viewed Abraxas as the supreme deity and the source of divine emanations, the ruler of all the 365 heavens, or circles of creation--one for each day of the year. The number 365 corresponds to the numerical value of the seven Greek letters that form the word abraxas.

### **The Akashic Records**

Written by: Prue Halliwell

Legends hold it buried somewhere near a rocky desert, is a fable book, penned by ancient mystics, known as the Akashic Records. Believed to be a written account of all significant events throughout time. To know the future brings, obviously, ultimate power.

To find them, one needs a map. A tablet found in the Ivory Colls is believed to be the very map. The engravings will tell the exact latitude and longitude of the Akashic Records.

# Alchemist's Tools

## Essence Bearer

An Alchemist would use a bottle such as this to capture and / or store a **L**ife essence. A Life Essence is comparable to a human soul, but made in a mixing lab. A well made **L**ife Essence can possess any living being but would prove toxic and eventually lethal to the being's pre-existing Soul.

## Crimson Scalpel

This ceremonial instrument is used by an Alchemist to open an incision in a body. The Demon then performs an incantation on the blood and lets it drip into the Essence Bearer, where it is mixed with other ingredients and transformed into a **L**ife Essence.

### **Alchemists**

Using metaphysical tools and dark magic, Alchemists can transform any substance into another. For example, an Alchemist's powers can turn water into gold and energy into matter. Sometimes, these demons also have the innate ability to transform the dead into the living by calling the souls back into corpses.

### Andras

Andras, the spirit of rage, uses anger as a portal to enrage his victims until they commit a grievous act of violence. Although the rage leaves the victim after the act is committed, the violence usually serves a greater purpose, making Andras a powerful foe. The Spirit of Rage has used abilities to incite wars that lasted for decades and redefined.

In addition, due to the insidious nature of his work, Andras can be extremely difficult to defeat.

## The Angel of Destiny

Written by: Piper Halliwell

The Angel of Destiny has the ability to freeze anything and anyone. He is beyond a witch's power and poses no threat. His mission is not to intervene (unless it is a desperate situation), but to offer rewards and chart new destinies to those who deserve it. The Angel of Destiny cannot help those who exist outside of time, space or destiny's reach. Those he has helped include Wolfgang Mozart and Britney Spears.

*Anton is a powerful warlock  
who has the power to glamour.*

*He will seduce a witch and give
